

Load carrier, aluminum profile for rails XC60

Op. No.: 89141

An elegant load system for carrying loads on the car roof using designed load carriers in aluminum and T-track for safe and practical assembly of Volvo's different load carrier accessories.

The aerodynamic designed load carrier gives a minimum of wind noise and air drag. The load carrier base is easily secured on the integrated rail profile with the help of the supplied torque wrench. An impact resistant, black plastic cover encloses the base while a rubber grip around the rail profile prevents marking.

Part. No.

30789025

Facts and advantages

- Easy and ergonomic assembly of the load carriers using a torque wrench
- Aluminum profile with T-track
- Complete kit with front and rear load carriers including torque wrench
- Some load carrier accessories must be adapted to fit the T-track
- The load carriers and load carrier accessories are lockable with an N marked key, which allows use of lock kit, see [Lock kit](#)

Technical data

Material:	Aluminum with protective housing in hard wearing plastic
Color:	Aluminum
Accessory weight:	4 kg (8.8 lbs)
Load width:	1100 mm (43 in)
Max. load capacity:	100 kg (220 lbs)
